Summary

Language enthusiast with a huge passion for coding and Web Development.

As a self-thought Frontend Developer, developed various projects using HTML, CSS, JavaScript, TypeScript and React. I am deeply driven to expand my knowledge and expertise in the Front-End Development, and I am seeking out every opportunity to showcase my unwavering passion and eagerness to learn.

As an ambitious individual, I am constantly striving to improve and determined to make a significant impact in the industry. With my dynamic and charismatic personality, I am confident that I can bring an unparalleled level of enthusiasm and energy to any team.

Experience

Jr. Frontend Developer

Pyxon Solutions

Nov 2023 - Present (Freelance)

- Development of DistroList web app for Distro Channels.
- Deep engagement with React, Vite, and TSX, ensuring a robust and scalable front-end architecture.
- Utilizing Redux Toolkit for efficient state management within the application, enhancing user experience and application performance.
- Actively participating in Agile processes, contributing to the continuous evolution of the project through iterative development and feedback cycles.
- Engaging in weekly meetings to discuss progress, set goals, and align with team members on project direction and priorities.
- Translating Figma designs into functional code, bridging the gap between visual concepts and technical implementation.
- Maintaining the high standards of code quality and application reliability through daily bug identification and resolution, ensuring smooth and uninterrupted service.
